Take Long Walks Fat Men are Told

How can you walk off your fat if you haven't any energy to do it? You can take off the fat with Kruenken's Fat Men's Tonic. It will take one-half teaspoon in hot water, twice daily, before breakfast, and you will feel better and exercise regularly.

There are all different sorts of Kruenken's Fat Men's Tonic. It will take one-half teaspoon in hot water, twice daily, before breakfast, and you will feel better and exercise regularly. It will take one-half teaspoon in hot water, twice daily, before breakfast, and you will feel better and exercise regularly.

WORLD HAPPENINGS BRIEFLY TOLD

Francis Watts, the authority on tropical agriculture, died recently at Port of Spain, Trinidad, aged 71.

The port of Vancouver, 1,100 miles distant from the greatest in the world, said the Minister of Marine, Hon. Alfred Durnford, in an address at Vancouver.

Dr. Charles F. Colver, D.D.S., who was largely instrumental in forming the Canadian Army Dental Corps early in the war, died in Toronto, in his 64th year.

When the Prince of Wales visits South America next year to open the British Trade Exhibition at Buenos Aires, he plans some extensive sight-seeing.

There were no legal barriers to the building in London, England, of a hotel by the C.P.R., despite a rumor from London to the contrary, company officials stated.

Another great European war in 1932, resulting in the annihilation of Germany, is predicted by General Ludendorff in a pamphlet just published.

The trade delegation of the Canadian Chambers of Commerce was entertained in Shanghai at luncheon by the Pan-Pacific Association before sailing for Hong Kong.

The preparatory disarmament commission adopted the first article of the naval armament section for total limitation and reduction of tonnage.

The British dirigible R-34, which crossed from Scotland to Minnesota, N.Y., in 1910, required 108 hours for the journey, 60 hours longer than the land-to-land crossing of the R-100 this year.

Premier MacDonald's official residence, No. 10 Downing Street, had a window smashed with a brick. A man whose name was given as Louis Colville Miller, 40, was arrested and charged with causing violent damage.

Australian Wheat Crop
Australia's wheat crop for 1930-31 is estimated at 200,000,000 bushels from 18,100,000 acres, as compared with 112,000,000 bushels from 14,000,000 acres in 1929-30, and 131,172,000 bushels from 12,576,000 acres, the average for five years, 1925-30 to 1929.

There has been no execution for murder in Denmark since 1892.

Picture of Health Now

"In May and June I was badly run down and had faint spells until it was as bad as I could make my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter." Mrs. George R. Gillespie, Pannych, Saskatchewan.

Personality Suffers In Mechanical Age

Toronto Minister Says Victorian Era Not Altogether To Be Pitted

The rise in general intellectual development in the modern age did not entirely compensate for the loss of the dominating personalities of the Victorian era, Rev. G. Stanley Russell, pastor of Deer Park United Church, Toronto, told members of the Toronto Public School Teachers' Association at its annual meeting. The loss of individuality and personality, he said, was one of the by-products of the enormous increase in mechanical inventions.

The art of hand-writing, he said, was passing because of the prevalence of the typewriter. People "banged" letters to one another on the typewriter, but the day of long hand-written personal epistles had passed its zenith. Because of the invention of the typewriter, people were laying by the use of their hands in writing and because of the advent of the motor car, they were losing their legs. The chance for close observation of nature, and one benefit to health as well, were being sacrificed when people gave up walking.

The glory and personality had likewise gone out of war. Military training, he stated, had no real bearing to warfare today because war has become merely a thing of mechanical and scientific devices.

Much sympathy, he felt, was now being wasted on people who lived in the reign of Victoria. It was a very happy period, he said, despite the jeers which a certain faction of the "moderns" hurled at it.

Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which was formed for the purpose of representing the interests of the newspaper workers in the city, has elected a new board of directors.

Reporter Plans Yukon Trip

Newspaper Man From Paris Will Write About Frontier Life In Canada

Seated by his newspaper, "Petit Parisien," to gather data on the northwestern parts of Canada, a young Parisian reporter, Aloucherie, passed through Montreal recently on his way to Yukon and Alaska where he intends studying the romantic and impressive surroundings that inspired Jack London's celebrated novels.

A year ago Mr. Aloucherie made a trip out west to investigate immigration problems, but this time, his inquiry will cover the life of the mounted police, the prospector, the Eskimo and the missionary. His trip, which has Vancouver as a starting point will extend as far as Ketchikan, Dawson and possibly Nome. Mr. Aloucherie is returning the path of the '38 gold rush.

Similar work, on previous occasions has taken the young French writer to Mexico and Syria, where he furnished the "Petit Parisien" with magazine material necessitated by intense competition now existing between the feature sections of Parisian newspapers.

New Job For Prince

Sir Philip Gibbs, Famous He Could Lead Endangered Arctic Expedition

Sir Philip Gibbs, famous travel correspondent and author, has submitted to the responsible authorities proposals for a novel overseas settlement crusade led by the Prince of Wales. The first contingent would be of one hundred men, mostly young men with their womenfolk, who would form new colonies and organized on the same lines as the expeditionary force to the north, with general headquarters staffed by administrators and experts including engineers, agriculturists and social organizers.

"If the Prince went into the distressed areas," says "Follow me," the young novelist would follow him in the great adventure if he promised to be his leader to go out with his men and visit them from time to time. The Prince alone could break down the political opposition of the Dominion and rally them to a new line of service on behalf of the motherland," says Sir Philip.

Long Cruise In Fishing Boat

Adventurers Reach Pacific Coast After Crossing Atlantic

Salting Through Panama Canal
E. W. Wilson, with a crew of three, has arrived in Nanaimo on the British "Lady Royal," a 25-ton fishing boat, after crossing the Atlantic sailing through the Panama Canal, and up the Pacific Coast.

The adventurous trip was at times full of hardships and danger. Often when more than 900 miles from land, provisions and water ran low. For two weeks the crew were reduced to one cupful of water a day. By steering into the passenger lanes, the little ship was eventually sighted by the Matson liner, "Wilhelmina," which supplied food and other necessities.

Will Build Poultry Market

Twenty market gardeners in the Winnipeg region are planning the construction of an all-year produce market in Winnipeg, to be conducted by the growers, each of whom will occupy a stall. The cost of the building will run to about \$35,000.

Milk Pool To Expand

The Saskatchewan Milk Pool, whose corporate name is "The Saskatchewan Dairy Co-operative Marketing Association Limited," has decided to expand its operations to include the production of milk for export.

Popular stories to the contrary there is no such thing as a hoop make which can put its tail in its mouth and roll along.

C.P.R. Hotel For London

Arrangements Have Been Made For Securing Suitable Site

Announcement was made by E. W. Beatty, chairman and president of the Canadian Pacific Railway Company, of the acquisition of a site for the hotel proposed to be erected by the company in London, England.

"After protracted negotiations, the company has succeeded in securing a hotel site in London, facing Berkeley Square and Bruton Street. The block is a substantial one, containing approximately 77,000 square feet in area. Negotiations for its acquisition are just about completed, and when possession is secured, which will not, however, be for some months yet, the work of construction will commence. In the interim, the company's engineers and architects will proceed with the preparation of preliminary plans. The hotel, when completed, will contain a minimum of six to seven hundred rooms."

Winter Service Arranged

Mail Will Be Carried Into North By Air More Frequently

Arrangements for an air mail service to the north will be made by the Canadian Pacific Railway Company, according to an announcement in the November supplement to the Canada Official Postal Guide.

The air mail service will supersede all previous mail services to the north and will effect more frequent and speedier communication than has been possible in the past. The frequency of delivery will be increased to more than double, and the time will be reduced to less than half.

The mail service between Herschel Island, Y.T., and Alaskan, N.W.T., will be performed by the Canadian Pacific mail service. The service will be irregularly by police patrol from Fort Resolution.

May Not Be Practical

Value Of Reading Machine Yet To Be Proved

A new invention from Berlin is a "reading machine" which will project printed pages upon a screen, enabling either a family or an entire audience to read together. The projector greatly enlarges the picture, presenting several pages of normal size, and is so constructed that it can be used for the projection of a film the size of a postal card. Whether this invention will be of any practical value remains to be demonstrated. The inventor declares it will revolutionize the publishing of books, since one of these small films can take the place of several books.

Would Be Safe

Rudiments Of Flying Taught In London, England, From Table-Top

A table-top teacher for the rudiments of flying is being used in London, England, to teach student flyers, from London, to teach student flyers. The "pilot" is provided with a real engine, and the controls are so arranged that the pilot will feel a wind up to 70 miles an hour. All movements of the controls are recorded by the enclosed "pilot."

Encourage Seed Cleaning

Saskatchewan Municipalities Take Advantage Of Government Assistance

Six Saskatchewan rural municipalities were provided with combination seed cleaning outfits, under arrangement with the Provincial and Federal Governments during this, the first year of operation of the scheme, according to Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan.

Under the plan the cost of the machines is shared by the two governments, the municipalities supplying the engine, the housing and transportation equipment.

Wanted It To Use

Plain Lady at Counter—'I want a cake of soap.'
Fancy Young Clerk—Yes, madam. Here is Prince Domestica's Boudoir soap, highly milled and finely scented. This here is Madame Nix's velvet cuticle soap, while this here was named after the Prince of Wales. Which one would you prefer?
Plain Lady—Have you any soap that will take the dirt off?

Automobiles Entering Canada
In 1919 the number of touring automobiles entering Canada was 238,000. In ten years (1919) this number grew to 4,509,000.
England's national expenditure today is \$4,300,000,000, an increase of \$3,775,000,000 over the 1913-14 figure.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid headache. They relieve you very quickly. They are effective and only give temporary relief, the cause of the headache is not removed.

The same and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkg.

Recipes For This Week

(By Betty Barclay)

CHERRY ROLLS
1½ cups special cake flour, sifted.
3 teaspoons baking powder.
½ teaspoon salt.

2 tablespoons butter or other shortening.
½ cup milk (about).
1 can (two cups) red cherries seeded and drained.

Shift four, once measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Roll in thick dough. Cover with cherries. Roll in long rolling pin, pressing together. Cut into 1½-inch slices. Place in greased pan and pour cherry sauce over them. Bake in hot oven (425 degrees Fahrenheit) 30 minutes, baste often. Serve hot, with sauce poured over them and a tablespoon of whipped cream placed on each slice.

Serve six. Cherry sauce calls for 1 cup sugar, 1 tablespoon flour, 1 cup cherry juice, 1 cup water and 1 cup sugar. Bake in hot oven (425 degrees Fahrenheit) 30 minutes, baste often. Serve hot, with sauce poured over them and a tablespoon of whipped cream placed on each slice.

APPLE SAUCE PUDDING

1 junket tablet.
1 tablespoon cold water.
1 cup thick apple sauce.
1 pint milk.
2 tablespoons sugar.

1 teaspoon vanilla (or other flavoring).
Season the apple sauce to taste with cinnamon or nutmeg, and divide it among 6 dessert glasses. Prepare the junket according to directions on the package. Pour carefully at once over the apple sauce. Let stand undisturbed in a warm room until set about 10 minutes. Then chill.

The Saboteur Herald editor is now spending a brief period out of town. Last week the make-up man assisted aided a boxing bout paragraph to the story of the most prominent wedding of the season. It said: The assembled crowd greatly enjoyed the fight, which was a slugging match from start to finish.

A new form of cold in London is believed to be caused by an insect sting.

Trying Hypnotism As Cure For Amnesia

Young Man's Memory Is Being Gradually Restored

Through the strange power of hypnosis, memory may be restored to the healthy young man who awoke last year in a small New Orleans hotel with his past a complete blank.

All other treatments have failed to penetrate the fog of his memory, the patient agreed to permit Dr. Paul C. Young, Professor of Physiology at Louisiana State University, to try hypnotism.

Dr. Young reported that three experiments conducted over a period of months at the East Louisiana Hospital had brought some results, and may prove as fruitful as those conducted by Dr. William Brown, British hypnotist, with shell-shocked veterans.

Bit by bit his past has been reconstructed, Dr. Young explained, by putting the patient under delusion that he was again a child. In the trances, Dr. Young said, the man had been called an orphan's home called "Sacred Heart," a sister Mary, of being a newboy in San Francisco and being called "Chuck" by his playmates. He also mentioned having infantile paralysis, which was proved by a physical examination.

Encouraged by the results, Dr. Young hopes to bring him through the stages of his life until he can piece out the threads lost when he awoke in New Orleans.

Outside of his loss of memory physicians said the man appeared to be healthy and normal. He has adopted the name of "Mason."

Dairy Production Higher

Latest Statistics Show Appreciable Increase For All Canada

"Statistics of dairy production at the present time indicate that there is an appreciable increase in milk and cream production all over Canada at the present time," observes Dr. A. A. Huddick, provincial commissioner of the Dominion Department of Agriculture. With respect to butter production Ontario and Alberta show a 15 per cent. increase for the first six months of the production year. Cheese production, of which 97 per cent. is centered in Ontario and Quebec, was 30,000 boxes behind last year at October 31. One of the interesting features in the dairy industry at the present time is the increasing demand for dairy stock in the prairie provinces.

Manitoba Honey Crop
Manitoba this year harvested the largest honey crop in her history, states L. T. Floyd, provincial apiarist. The reports completed Friday, Nov. 14, on which the total crop estimate is based, places the figure at 10,110,123 pounds of which only one-half is reported sold. The average per colony reported was 163 pounds. The season this year was ideal as every one with a hive of bees reports a crop, some excellent reports coming from the far north in the inter-lake country.

FRUIT SALT

Mother! Don't Risk Their Health With Violent Purgatives

Constipation is one of child-hood's greatest enemies. Unless the intestinal system is kept clear and clean this health is almost sure to follow.

But severe laxatives are dangerous. The body system of child or adult is not meant to withstand the unnatural, forcing action caused by ordinary, cheap cathartics.

FRUIT SALT is a glass of pure, every morning is the safest, surest, and most pleasant way to insure cleanliness and perfect health.

THE DUSTY HIGHWAY

BY CHRISTINE WHITING

PARMENTER

Copyright 1929

CHAPTER V.—Continued.

"He moved on slowly, reaching Nick's gate and looking up at a doorway beautiful despite its peeling paint. There was no sign of Gay. In Baker'sville most men come home at noon, and at eleven-thirty their wives are in the kitchen. With the uttering instinct of one born and raised in the community, John Maxwell made his way toward the side door.

He saw then that Gay was in the orchard, hanging some diminutive pink garments on the line. Her task done she glanced across into her neighbor's garden, where, still clad in crisp blue linen, Mrs. Halliday was superintending the setting out of plants. Glancing up, she caught Gay's eye, and bowed. There was nothing friendly in the act—nothing akin to the greeting she had tossed across the square to Nick, a few hours earlier. Now, as Gay caught sight of him, she smiled.

"Mr. Maxwell! What brings you out this morning?"

"Only the spring. Couldn't seem to settle down to work, and Nick gave me leave to take a holiday."

Gay laughed and said: "Will you stay to dinner with us?"

"Not today. Guess you have enough to do cooking for your own three boys. Nick's still a boy to me, you know, if he has been married long enough to acquire a family. Do you like your new neighbor, Gay?"

They had reached the porch, and the girl sank down wearily, glancing at the pocket of her dress, which was held at one corner by a safety pin.

"I hope you don't think I use pins instead of needles for my sewing!" Her glance strayed to the trim blue figure across the hedge, and her color rose. "It's Sonny does it. He can just reach my pockets and he will pull at them. Sometimes he tears them when I can't stop to mend."

She was silent for a minute before she said, in answer to his question: "You asked about the Hallidays? I

appointed, especially when the second baby wasn't a 'little sister,' though he wouldn't change either of them now," she added, smiling.

"Daddy?" asked the child, looking up questioningly at his mother.

"Nearly time for him," Gay answered, nodding tenderly. "Daddy's the first word he said, Mr. Maxwell. I remember feeling the least bit hurt! And Nick's such a wonderful playmate that he adores him."

She stopped because the boy had uttered a delighted squall. He wiggled away from John Maxwell's knee, while the watch, forgotten, hung limply by its chain. Nick was content! With swift, unsteady feet the child ran to him; and with a sense of genuine relief the president of the First National Bank saw that his paying tale had no eyes for lady across the hedge. He stooped with outstretched arms, and lifting his small son high, kissed the top of his bright head—burred him a moment rapturously, and settled him on his shoulder as he came forward.

"A pretty sight, that," said John Maxwell softly.

But Gay did not speak. She had arisen, and was watching her husband with an intensity not quite natural in a wife of four years standing. The blue figure in the adjoining garden was also watching her. Nick was serenely unconscious of an audience. He came nearer, grinned, and said: "Is this the way you take a holiday, Mr. Maxwell—calling on my wife? Mind if I kiss her? It's a sort of habit I've acquired."

"The Tablets are mild laxatives that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order, the child is healthy, and the health of the little one will be good and naturalized. "Implicable" May Be Kept In Repair If Plans Are Successful

After a century of service with the Royal Navy, "The Implacable" some 20 years ago, was condemned to be sold. She is the last of the ships preserved from the battle of Trafalgar now actually about to be scrapped.

Wheatley Cobb persuaded the Admiralty to lend him the ship, and she was moved to Portsmouth. He maintained at his expense. For the last three summers she has been used as a holiday training ship. Efforts are now being made by naval military and civil leaders to keep "The Implacable" in repair and provide for its maintenance.

Feetish, pale, restless, and sickly children, over their conduct to women. Mother Graves' Extremist will relieve them and restore their health.

New Survey Ship For Canada

Construction at an early date of two hydrographic survey vessels, one for use out of Victoria on the Pacific coast, and the other for the St. Lawrence, is under consideration by the Dominion Government, stated Hon. Alfred Durnan, Minister of Marine, who was in Victoria on an official visit of inspection.

Wife—"Is that the hole naughty kids made in your bed?"

Husband—"No, darling, this is the hole I made for him."

When Children FRET

THEIR are times when a child is too fretful or feverish to be soothed by any other means than a mother's milk.

For diarrhea, and other infantile ailments, give this pure vegetable preparation. It is the gentlest and most reliable of all remedies, and it is the only one that can be used by the mother.

Afraid Of The Truth

Impossible To Get Unbiased News From Russia

Complaints are sometimes made that so many British newspapers, including the London Times, do not maintain scrupulously correct news in Moscow. But in Russia today there is no place for a responsible correspondent of an independent newspaper. When the Times send a correspondent to Russia it will be to supply its readers with honest and unbiased information, and such information can clearly be neither gathered nor telegraphed by a correspondent working under an arbitrary system of espionage. There is no discrimination in this matter, as is sometimes supposed, between Russia and the rest of the world. If similar conditions were ever to prevail in Italy, for instance, or in Turkey, the correspondent of the Times would instantly be withdrawn, as correspondents have sometimes been withdrawn from foreign countries in the past. It is not the least significant incident of the present regime in Russia that its leaders are afraid to let the world know the truth.—London Times.

Guard the Baby Against Colds

To guard the baby against colds nothing can equal Baby's Own Tablets.

Influence Of Small Economies

Substitution Of Horse For Machinery Would Have Far-reaching Effect

It is interesting to note a statement of E. B. Ramsay, chief of the Canadian Board of Grain Commissioners, that the use of the horse as a return to the use of the horse. At ten cents a barrel, he says, a horse is a cheaper fuel than gasoline at twenty cents a gallon.

It is not that replacement is so often necessary. Moreover, it is likely that, in any emergency, governments will have recourse to the direct taxation of oats to pay the charges of the public debt and make good times.

If such a change really takes place, it will probably tend to cause unemployment in the farm implement factories and so will oblige higher taxation of gasoline. It will show, at all events, the influence of small economies. Farmers' News.

Depends On World Conditions

Canada's Business Will Improve When Foreign Markets Start Buying Products

That business conditions in Canada will improve almost simultaneously with the improvement of world conditions is the general opinion expressed by financial and investment organizations. Bearing in mind the fact that Canada is dependent on foreign markets for the absorption of about 80 per cent. of the products of her forests, 60 per cent. of her metal production, and 70 per cent. of the fish caught in Canadian waters, it would seem that the opinion should have a basis in fact.

Original Message Autographed

Following the Armistice Day ceremony at the Cenotaph in Montreal, General Sir Arthur Currie, who, as commander-in-chief of the Canadian forces, issued the message on November 11, 1918, advising troops that hostilities would cease, autographed and dated the original message now in the possession of a group of officers of the 8th Battalion, Canadian Grenadier Guards.

For Dry Skin—Minard's Liniment.

Maybe... you've never thought of this

Next time you want soft water in a hurry try Gillett's Lye. Dissolve one tablespoonful in a gallon of cold water* and use this solution for cleaning sinks, refrigerators, floors, tiling, etc.

For washing dishes, dissolve one tablespoonful of Gillett's Lye in one quart of cold water. Keep in a labelled bottle and put a few drops in the dishpan whenever you wash up.

*Lye should never be dissolved in hot water.

Big in Many Ways

Famous Aviators Have Proved Themselves Good Sportsmen

Evidently Igor I. Sikorsky did not puff up with pride even though he and Maurice LeBlond were the first to span the Atlantic in an eastward flight without a forced landing. When the Canadian aviator reached his native land by ocean liner, the other day, he was asked by reporters to name the greatest aviator of the world.

When Kingford-Smith arrived at Port Darwin, where misfortune forced Flight Lieutenant Hill out of the race, he said to the two flyers to see who could smash Hitler's record for the England to Australia hop, he expressed extreme regret at the accident, which had befallen Hill.

Hill manifested good fellowship by offering Kingford-Smith his collapsible bed, upon ascertaining that his friendly rival lacked such a device.

These instances seem to indicate that the world-famous flyers are big in many ways.

Income Tax Collection Record

Record Breaking Mark Is Set By Income Tax Collections

A new all time record for income tax collections has been set since April 1, 1930, up to the present, \$69,000,000, having been deposited with the Federal Treasury in that period by Canada's taxpayers.

According to announcement at the Department of National Revenue, this total is approximately \$2,300,000 ahead of the previous year's total.

The record-breaking mark set by the income tax collections is interpreted in government circles as indicating business conditions in the Dominion are favorable. Money, at least, cannot be extremely scarce with the taxpayers paying up so promptly.

Other financial returns for the period under review are not, however, so favorable. The customs revenue have dropped \$30,000,000, while excise revenues are down \$15,000,000. The drop in the latter is attributed largely to the prohibition of liquor exports to the United States.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powder. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Kitly. How do you like my dress? Did I give it to me for my eighteenth birthday.

Cattle. It's certainly worn well, hasn't it?

Fortunately for father, Willie's history teacher isn't requiring any home-work on the Chinese War.

For treatment of caked bags in cows, or gargle, use Douglas' Egyptian Liniment. The quick, sure remedy. Save time and expense. Prevents blemished milk.

New discoveries of cavemen containing paintings of wild animals made by prehistoric cave men have been found in France.

Prompt relief from HEADACHES, SORE THROAT, LUMBAGO, RHEUMATISM, NEURITIS, RHEURALGIA, COLDS, ACES and PAINS

DOES NOT HARM THE HEART

ASPIRIN

Accept only "Aspirin" package which contains proven directions. Handy "Aspirin" boxes of 12 tablets. Also bottles of 24 and 100—All drug stores.

TOO MUCH ACID

may be causing those frequent headaches

WHEN there's too much acid in your stomach, you must force yourself to work, and even pleasures are too great an effort. Appetite lags, the digestion is poor, the whole system suffers.

Laboratory tests show an acid condition is due to worn in our modern diet. But you need not try to diet your way out of the trouble. Take a tablespoonful of Phillips' Milk of Magnesia.

This will neutralize the excess acid instantly; make you feel like a new person in just a few moments. Take a little whenever heartburn, acid headaches, nausea, flatulence, indigestion or biliousness show the digestive system is becoming too acid. Whenever you are taking cold or feel sluggish, weak, constipated, Phillips' Milk of Magnesia has a gentle laxative action.

Delightful to take. Endorsed by physicians for 50 years and prescribed everywhere for men, women and children. The genuine is always a liquid; it cannot be made in tablet form. It always bears the name Phillips' for your protection.

THE SUGAR BEST PROBLEM

Every farmer in the irrigation
block and everyone interested in
the agricultural industry here
should make an effort to attend the
meeting of the Bow Valley Sugar
Beet Growers Association in Brooks
next Monday afternoon, December 1.

This meeting will be of an educa-
tional nature, and every phase of
of the beet sugar industry in Alberta
its past history and future pros-
pects will be discussed. Of par-
ticular interest will be the possibi-
lities of the beet sugar industry in the
C.P.R. eastern irrigation block, the
development of the Bow Valley
Sugar Beet Growers' Association, and
what the association has accom-
plished to date.

The farmer of western Canada,
particularly the irrigation farmer, is
passing through trying times. Any-
thing which will help the farmer
along the road to prosperity, should
be given deep thought and careful
consideration. Agriculturists who
advocate the growing of sugar beets
are in this industry a solution, or a
partial solution to the farmer's
difficulties.

The growing of sugar beets is not
total road to prosperity. The
industry has its own problems, both
physical and economic. But it is
hoped that these problems will be
set and solved, and the industry
placed on a more sound basis than
at present so that the grower of
beets will receive a generous and
profitable return for his product.
To present the case for the beet
sugar industry, to lay before the
farmers of the irrigation block all
the information pertaining to the
industry and its future prospects, is
the object of the meeting next Mon-
day.

The problem is one of paramount
importance to the irrigation farmer.
It is the question of the hour. It
deserves the serious consideration
of everyone interested in our agri-
cultural prospects.

LOCAL SUNSHINE

This winter there will be a number
of families in the district who will
require assistance if they are to go
through the winter without suffer-
ing severe hardships.
A relief system of some kind, to
help these needy people would be a
great amount of good and would be
much appreciated by those who re-
ceive aid.

Doubtless there are many homes
in the district where clothes will be
found that the children have out-
grown, clothes that would keep some
little boy warm this winter, if the
needy only knew of the plight of the
needy one, and an organization
formed to see that the needy one was
supplied. Then there are dolls and
toys which girls and boys with a
plentiful supply of playthings would
gladly part with to bring joy and
sunshine to some other girls and
boys at Christmas time.
Belief of this nature would do a
great amount of good and would cost
no more than time and effort.

Communication

THE FARMER AND THE EXPERTS
Editor The Bassano Mail.

Dear Sir,
The Federal Minister of Agricul-
ture has proposed a conference of
agriculture officials for the purpose
of discussing agricultural problems.
Some Western papers have pro-
tested. They have asserted that
these meetings are more official for
rides. That may open to question.
Much effective work is done by the
Department of Agriculture and the
time has now arrived when this
work may be put to a practical test
and something evolved of real bene-
fit to western agriculture.

There are capable men in the Fed-
eral department of Agriculture.
They have the guidance of past ex-
perimental work. They have their
scientific studies to help them. The
Federal Government can prove the
worth of this work by demonstra-
tion, at this time, that farming in
Western Canada can be made to pay.
Why not in each Province have three
or four farms operate them with
all the scientific knowledge at the
command of the Department and
make them pay. The farms can be
of the size which experience has
shown to be the best adapted to pro-
fitable operations. They can be op-
erated not as experimental stations,
but purely as farms. The Govern-
ment department, undertaking this
work, would duplicate, as far as pos-
sible, the actual position of a west-
ern farmer. The manager of the
farms would be asked to make the
farms pay. It would have to pay in
the same way as a commercial or
manufacturing proposition pays. It
would have to pay operating ex-
penses, wages of the help, interest
upon capital invested, depreciation,
profits and dividends to the owner.
We have never had a demonstration
of that kind—it ought to be done.

If this were done, we would then
have an actual demonstration, made
by competent men, showing exactly
what can be done on a farm on the
prairie under the present conditions.
Our different experimental farms
are not worked upon this basis.
They have large expenditures not
relating to ordinary agriculture.
They must be maintained, to a cer-
tain extent, as show places. A great
deal of work must be done which is
not required on the ordinary farm.
There must be a large amount of ex-
perimental work, costly in its nature
but of great value to the community
as a whole, but farms such as I sug-
gest would eliminate all these fea-
tures. They would be essentially
practical farms, operated for the
purpose of demonstrating the best
methods and showing what can be
done by these methods in a practical
way.

The present Minister of Agricul-
ture is a farmer. He has the experi-
ence to guide him. He is a practical
man. This is essentially a practical
problem. What a tremendous help
it would be to agriculture and in-
dustrially to the Federal Department
of Agriculture if it could be demon-
strated that farming under present
conditions was really a profitable
business.

There is one other thing which
would result from this operation
which might appeal particularly to
the farmer of Western Canada. From
time to time, in Parliament,
someone protests that the farmers
of Western Canada pay very little
income tax. The implication
though not the open statement is
that many western farmers make
very large incomes and that by rat-
ing smart book-keeping what is
the income tax. The government
farms operated as suggested, would
show exactly what the farmer could
earn if he were adopting the best
methods, and would be an indication
to the government as to the amount
which the average farmer in west-
ern Canada might reasonably be ex-
pected to pay.

We have had discussion, we have
had theory. Surely the west today
would like to see a practical demon-
stration from the men who are giv-
ing advice. If this country could get
from the Federal Department, an
indication of what may be done by
proper effort, it would be an in-
spiration. And who knows—the De-
partment itself might learn some
things it does not know now about
the actual conditions of western
agricultural operations. What have
the farmer readers of this publi-
cation to say in regard to this
proposal?

Sincerely yours,
H. J. Deachman,
Ottawa, Ontario

SUNSHINE NEEDS AID IN RELIEVING DISTRESS

An organization which is working twelve months in the year and particularly during the cold weather months to help those in distress is the Calgary Herald Sunshine Santa Claus Fund. Every year at this time an appeal is made to contribute to the fund and assistance is sought, not only in the City of Calgary, but throughout the province for the reason that the Sunshine Society helps to relieve suffering in various parts of Alberta, as well as in the City of Calgary. Sunshine has been functioning for eighteen years and in that period has relieved the distress of thousands.

It is a good thing for Alberta that such an organization exists because there are many cases which cannot be assisted through official sources and yet, if the cases are not helped, the suffering would be intense.

Those who are in the happy position where their lives are comfortable are invited to consider the plight of those who lack the comforts and necessities of life and are invited to show their warm-heartedness through the medium of contributions to the Sunshine Society.

"Has your wife an appreciation of humor?"
Customer: "I'm sure she does, she better she likes it."

Notice

TAKE NOTICE that a meeting of all prospective Sugar Beet Growers and those interested will be held at Brooks, at 2:00 o'clock in the afternoon of Monday, 1st December, 1930, for the purpose of receiving reports of officers and others, and for general discussion.

Dated at Bassano, Alberta, this 22nd day of November, A.D. 1930.
DOW VALLEY SUGAR BEET ASSOCIATION,
per William McEwen,
secretary treasurer.

Local News

J. Edwards was in from Majorville for a few days this week.

The provincial government party of road engineers under J. Chappelle is leaving in a few days for Brooks where they have a few months' work on a new road.

Dr. Geo. Haworth left for St. Paul, Minnesota, early Tuesday morning, accompanying A. A. McConell, who was returning home. Mr. McConell was taken off the trip at Bassano and spent a week in the local hospital.

A number of young people from Bassano attended the play and dance at Hensar last Friday evening.

W. G. Nelson and J. J. Bell were down from Hensar Wednesday evening to attend the meeting of Hensar chapter.

The W. A. of the Anglican Church will hold a tea, sale of home cooking and fancy work at the home of Mrs. Strathers on Saturday, December 6, from 3 to 6 p.m.

C. A. Slime, of Canmore, is a patient in the local hospital. An operation was performed on his arm.

Mr. and Mrs. J. M. Wheatley, of Canmore, visited this week with Mr. and Mrs. Ben J. Palmer.

Mrs. J. H. Stiles, daughter of Mrs. A. W. and Mrs. Ben J. Palmer, is a twin and sale of candy will be held at the home of Mrs. A. McKee on Saturday, Nov. 28, from 3 to 6 p.m., under the auspices of the Junior girls of Knox Presbyterian Sunday school. The proceeds are for the Woods' Christmas Home, Calgary.

Ben S. Palmer, Alberta Wheat Pool director, is attending the pool delegates' meeting in Calgary this week.

The High School Literary Society held a dance in the Oddfellows' Hall last Friday evening. All who attended said it was the best dance the society had ever held.

Frish: "What keeps the moon from falling?"
Another: "It must be the beams."

ONE GOOD RECIPE MAKES A COOK FAMOUS

A delicious accompaniment to any cold meat dish is made by putting one half cup of cold boiled sweet potatoes in buttered sauce. Cover with 1 cup of sliced raw apples, sprinkle with one quart cup of brown sugar, dot over with pieces of butter and salt, on top of this place another cup of cold boiled sweet potatoes. Bake in a moderate oven for one hour. Besides being a delicious dish this offers a new way to serve sweet potatoes.

"A Good Time We Had"
Did your little boy enjoy the party? asked Mrs. Brown.
"I think so," sighed the little boy's mother. "He was absolutely ill half past five the next afternoon."

PARLIAMENT BUILDINGS, EDMONTON, ALBERTA

Parliament Will Not Meet Until Early In March

OTTAWA, Nov. 26.—While official announcement will not be made until within a month of the event it is not the intention of the Bennett Government to call parliament together until approximately March 1. He decided is, of course, subject to amendment but the reasons which led to it will hardly be altered. They are, firstly, that the delay will permit the government to complete its entire tariff revision and to have its budget ready for submission as soon as the debate on the address from the Throne is concluded. Secondly, that by meeting in January the House will only add two additional months of debate to Hensar.

While the House is in session departmental business necessarily languishes as Ministers are otherwise engaged. A January to June session, followed by the holiday months of July and August, would knock eight months out of the departmental year, or at least hamper administration for that length of time.

All the general argument on tariff revision might be concluded in two weeks but it is a matter of record that on a major tariff revision every item will see reiteration of the argument until hot weather drives the membership home. Next year, when the House assembles in January or March, it will talk until two months can be saved for departmental work if the session is called in March.

Tariff Revision Throws Huge Task On Customs Staff

OTTAWA, Nov. 26.—The last nine months of 1931 promise to be the worst in the history of the customs division of the Department of National Revenue.

Complete revision of the 118 items which comprise the tariff schedules will be introduced in parliament late in March or early in April. While the revision may not be endorsed by the House for three months the schedules almost by their nature, become effective from the moment they are presented. Such changes as are confidential until before the House and are not, therefore, available to the men who must enforce them until they are made public. The net result is that every appraising officer must learn alone the rates to be charged and the regulations affecting valuations in every class of goods.

Revision of approximately 280 items this year has stamped the department with appeals and protests from importers to such an extent that a special customs court to deal with them is strongly advocated. The most exhaustive revision in history scheduled for 1931 commences will be at least four times as great as in the current year.

GRANT FLEMING, M.D., — ASSOCIATE SECRETARY

COMFORTS

Most uncomfortable things have at least one or two points in their favour. The comfort, or pacifier, has not only a soothing feature which may be put forward to balance the many bad and undesirable qualities it possesses.

To begin with it does not even do what its name pretends. It does not comfort or pacify the baby. Cry baby is stopped for a time, because baby always stops crying when he gets what he wants, and he doesn't want his comfort if he has been used to having one.

Some parents may think that the baby's high cries for the comfort should be given to him, as he apparently knows what he wants. But he never gives him everything he craves, and teaches for, so that they distrust him when they give him because they know that the baby does not want what is good for him.

The constant sucking of the comfort makes the child irritable, and leads to upset him. It keeps him for a few minutes, because he gets what he wants, but after that it only irritates him.

A serious result of the use of the comfort is the deformity of the mouth that results if the habit is continued. The bones of the baby's body are comparatively soft, and rather easily moulded. The constant sucking of the comfort forces the bones around the mouth into an abnormal shape. Projecting teeth are among the monthly deformities that follow.

The most serious conditions that

result from the use of the comfort are due to the introduction of disease germs into the mouth of the child. It is impossible to keep a comfort clean. To do so would mean that it should be boiled every time it is used, just as the feeding bottles and nipples are boiled after they are used. The comfort is moist and as it hangs from the child's neck it comes into contact with many articles, the result is that it is soiled by the many things which it touches.

The use of the comfort is simply a bad habit which during the childhood period leads by deferring the mouth and one which is, no doubt, a real factor in the spread of disease.

There is no person with a baby should be constantly sucking at something. The comfort does not help to keep the baby healthy. If the child is irritable, there is something wrong which should be properly dealt with, and must certainly the proper way to relieve him is not by sucking something into his mouth.

Not so many years ago, every baby was tucked in a cradle and put into long clothes that prevented him from kicking and thus having the extreme he needed. The rocking cradle and the long clothes have passed into disuse and the sooner the comfort goes the same way the better it will be for the baby.

Questions concerning health, addressed to the Canadian Medical Association, 104 College Street, Toronto, will be answered promptly by letter.

Prairie Provinces Are 25 Years Old

OTTAWA, Nov. 25.—It is just 25 years since the Provinces of Alberta and Saskatchewan were created. At that time the population of Alberta was 15,000. It is now about 500,000. Saskatchewan in 1905 had a population of 150,000, now it is 500,000. The total area under cultivation in Alberta 25 years ago was 60,000 acres, in Saskatchewan 200,000 acres. In 1930 Alberta had 1,000,000 acres under crop and Saskatchewan 2,000,000 acres. The total production of Alberta has advanced in value from \$2,000,000 in 1925 to over \$20,000,000 this year. Similar increase has been made in Saskatchewan.

Progress has been equally as noticeable in a number of other directions. In each of the two provinces the per capita income has increased, the number of automobiles registered has increased, the number of telephones has increased, the number of farms has increased, the number of schools has increased, the number of churches has increased, the number of hospitals has increased, the number of libraries has increased, the number of theatres has increased, the number of hotels has increased, the number of restaurants has increased, the number of clubs has increased, the number of societies has increased, the number of organizations has increased, the number of associations has increased, the number of unions has increased, the number of guilds has increased, the number of lodges has increased, the number of chapters has increased, the number of branches has increased, the number of divisions has increased, the number of districts has increased, the number of provinces has increased, the number of countries has increased, the number of continents has increased, the number of worlds has increased, the number of universes has increased, the number of galaxies has increased, the number of clusters has increased, the number of superclusters has increased, the number of voids has increased, the number of filaments has increased, the number of sheets has increased, the number of walls has increased, the number of bubbles has increased, the number of foam has increased, the number of suds has increased, the number of lather has increased, the number of soap has increased, the number of detergent has increased, the number of cleanser has increased, the number of scrubber has increased, the number of brush has increased, the number of sponge has increased, the number of cloth has increased, the number of towel has increased, the number Carry Over Wheat In Canada For 1931 Expected To Be Less

Ottawa, Ont.—Canada had a surplus of 31,000,000 bushels of wheat on Oct. 31, according to an estimate in the review of wheat conditions issued by the Dominion Bureau of Statistics.

If the present sales policy is continued, the carry-over at the end of the present season (July 31, 1931), will be less than last July. The review states:

"The carry-over of wheat in Canada at July 31, 1930, was 12,000,000 bushels and the total 1930 wheat crop is now estimated at 386,000,000 bushels. Allowing 110,000,000 bushels for seed, home consumption and unmarketable grain, and adding 85,000,000 bushels exported in the period up to October 31, accounts for a total of 195,000,000 bushels.

On the basis of the official estimate of carry-over and production, a surplus of about 313,000,000 bushels existed at October 31, and it is seen that a continuation of present sales policy will result in a reduced carry-over in 1931. A great deal depends upon economic conditions as well as economic policy in the United Kingdom and Europe. The relations of Northern American supplies to normal before the 1931-32 season will be an important factor in future price levels.

The 1931-32 season will be an important factor in future price levels. The fall movement of grain from the head of the lakes means adequate stocks in ready positions for winter export. The fortunate distribution of the crop will also be a helpful factor.

The high quality wheat for eastern shipment and the low quality wheat suitable for the Orient are in the most favorable situations for export movement, the former being better than Manitoba and Southern Saskatchewan, while the latter covers the northern and central regions of Alberta and Western Manitoba.

After a slack period during most of October, daily deliveries of wheat began to exceed those of the same date last year on October 25, and since that date the cumulative total of the 1930 crop has been consistently in excess of the 1929 total.

In the crop season up to November 11 the total wheat marketed in 1930 was 196,000,000 bushels compared to 180,000,000 bushels in 1929. The provisional estimate of the 1930 wheat crop of the Dominion Bureau of Statistics is 374,000,000 bushels. Of this amount, about 42,000,000 bushels are retained for seed in the fall and at least 15,000,000 bushels will be unmarketable or lost in cleaning on the farms.

Estimates will be made later of the amount fed on farms and custom milled by country mills for consumption on western farms. On the basis of the provisional estimate, with reasonable deductions for valid items, probably 110-115 million bushels of wheat were still in the hands of western farmers on November 11th.

Coast Farmers Ask Protection

Minister of Trade Requested To Safeguard British and Allied Industries

Victoria, B.C.—Large shipments of New Zealand butter are now held in cold storage in British Columbia awaiting price recovery, and by reason of the absence of a stated price does not come within the provisions of the anti-dumping clause of the tariff act, it was stated before a meeting here of the advisory board of the farmers' institute of the province.

The British Columbia butter market was now depressed far below the cost of production. It was stated, largely because of the Australian trade treaty, a secondary factor of great immediate importance being the recent importations from New Zealand.

The board passed a resolution noting repeated negotiations between the Canadian Government and the governments of Australia and New Zealand, and asking the Minister of Trade and Commerce that immediate steps be taken to restrict the dairy, sheep and allied industries from what was described as "demoralization."

Might Help Unemployment

London, England.—The Labor Government is considering a "back to the farm" solution for the nation's unemployment problem. It is working on a bill to provide garden plots and small farms for jobless men.

W. N. 1. 1865

Exhibit Of Choicest Products

Varied Display Seen At Royal Winter Fair In Toronto

Toronto, Ont.—The choicest of Canada's agricultural products and the bluishob and poultry were on display here, without any ceremony in speech-making, the gates of the Royal Winter Fair were opened to the public. Housed in the buildings at the Canadian National Exhibition Grounds were hundreds of horses, livestock, poultry, fowls, and cats and dogs, seeking glory in their respective classes, while in other buildings were aisles and aisles of fruit, flowers, fish products and game, the best Canada and the United States has to offer.

Perhaps the most varied show was the great display of apples, entered for competition by farmers and associations from Prince Edward Island and British Columbia. The displays consisted of boxes of apples, ready for shipment and placed one box beside the other, 10 crates high and 25 crates wide, creating a great glistering sea of red and green.

The show was officially opened by Sir Robert Borden, when the former premier addressed the throng in the huge Coliseum.

Will Be Shipped To England

Alberta Bred Mare From Prince Of Wales Ranch Sold To Yorkshire Man

Toronto, Ont.—Owned by the Prince of Wales, and born on his ranch at Pelsko, Alberta, a six-year-old Percheron mare and her foal, now at the Royal Winter Fair, are going to make history in Canadian horse-dom. "Princeton Carman," winner of many ribbons in the Percheron class throughout the west, and her colt, "Princeton June," have been sold to Lord Middleton for an undisclosed sum last Tuesday. The pair were bought from Montreal for his farm at W. L. Carlie, manager of the E.P. ranch, sold recently.

Thousands of purchased horses have been shipped to Canada from England, to improve Canadian stock, but Mr. Carlie believes that this is the first instance of imported Canadian horses being sent to England, the home of fine bloodstock.

No Change Likely

Tariff At Churchill To Be Same As At Other Canadian Ports

Ottawa, Ont.—It may be taken for granted that the present government is not contemplating a tariff schedule on imports from Canada. As Churchill is to be different from the tariff on goods coming at any other Canadian port. This was stated by Hon. R. A. Hoey, acting premier of Manitoba, that Churchill is made a free port of entry for British goods coming to Canada.

A number of ports in Europe are known as "free ports." Goods may be shipped into stores in such ports without any customs restrictions and then sold. However, such ports have to meet the tariffs of the countries to which they are ultimately consigned.

Advocate Free Port

Portage la Prairie, Man. Proposal that Churchill, the West's sea harbor on Hudson Bay, be declared a free port of entry for British goods, was made by Hon. R. A. Hoey, acting premier of Manitoba, at the annual convention of the United Farmers of Manitoba. He considered that such a move would tend measurably to reduce the establishment of the West's agriculture on a permanently profitable basis.

May Withdraw From League

Santiago—Chilean government is considering withdrawal from the League of Nations, believing itself to have been slighted. By the larger European members. Rejection of Chilean candidate for seat on the world court bench is regarded as further confirmation of withdrawal. It is said.

Money To Be Returned

Rio De Janeiro.—Provisional President Getulio Vargas signed a decree returning to the Bank of London of South America, Limited, and other banks, the approximately \$1,000,000 requisitioned during the recent revolution.

More Funds Are Set Aside For Relief Purposes

Ottawa, Ont.—A new list of expenditures approved by Hon. Gleason Robertson, Minister of Labor, brings the amount of joint total expenditures of Dominion, provincial and municipal governments, for unemployment relief and relief works, up to \$45,660,750. Additional sums approved for Nova Scotia and Manitoba augmented the previous total by \$1,038,755.43, of which the eastern provinces' share is \$196,205.43, and that of Manitoba \$122,550.

The grand total is now distributed as follows: Nova Scotia, \$1,025,305; Prince Edward Island, \$144,000; New Brunswick, \$468,300; Quebec, \$3,560,800; Ontario, \$10,723,103; Manitoba, \$192,740; Saskatchewan, \$1,476,941; British Columbia, \$1,476,941; Yukon, \$1,476,941; Canadian Pacific Railway, \$1,551,400; Canadian National Railway, \$1,551,400; grade crossing fund, \$50,000.

The program of construction which will be engaged in by the Canadian National Railways, under the arrangement whereby interest on necessary borrowings is paid by the government, was announced here recently. The arrangement is made as to speed up construction, etc., in order to give employment as soon as possible. The total estimated cost of the program is \$9,048,633, of which \$4,654,748 constitutes the proportion to be paid by the railway. The remaining sum will be met out of the grade crossing fund and other sources. The amount of contributions to be determined by the Board of Railway Commissioners.

In addition to the total sum mentioned there is a further amount of \$110,750 for rails and ties. This list of works includes: Free storage sheds, Fort William, Ont., total cost \$132,000, railway proportion, \$132,000; Subways, Saskatoon, Man., total cost \$300,000, railway proportion, \$150,000; Division railway line, Westfort, Ont., total cost \$550,000, railway proportion, \$550,000.

Return to miller's main line with new heavier rails at a total cost of \$1,100,000, to be borne by the railway. The health department estimates from its complete data that there are 750,000 crippled children in the nation.

Rapid Telegraphy

Telegraph Transmission At A Speed Of 9,120 Words A Minute

London, England.—Addressing the London branch of the Engineering Institute of Canada here, R. B. Steele, assistant chief engineer of the Canadian National Telegraphy, announced that the transmission of telegrams at the speed of 9,120 words a minute would be made possible shortly by further perfection of the carrier-current system.

In 1927, Mr. Steele said, the C.N.T. Telegraph increased by means of carrier current the capacity of a pair of wires from 400 words a minute to 4,120 words a minute for a single pair of wires. Further development of the system now made possible the transmission of 9,120 words a minute for a single pair of wires.

Col. C. W. Peck of Prince Rupert, B.C., only member of parliament to hold the Victoria Cross, who was one of the main sponsors of this medal to attend the V.C. dinner held November 8, in Toronto, Ont.

Independence For India

Voice Of Indian Heard At Round Table Conference In London

London, England.—India's round-table conference heard a voice from India in a demand for complete independence.

"I do not come to ask for Dominion status," exclaimed Muhammad Ali, one of the famous All India brothers and a leader of the All-India Muslim League. "I do not believe in the attainment of Dominion status. The one thing to which I am committed is complete independence."

The Hindus and the Moslems alike challenged the Conservative view, expressed by Lord Peel, when the former secretary of state for India declared Dominion status had not been promised as an immediate gift, but had merely been pointed as a goal by the present Viceroy of India, Lord Irwin.

"I want to go back to my own country," Muhammad Ali declared, "only if I can go back with the substance of freedom in my hand. Otherwise I will not go back to the slave country. You will have to give me a grave here."

"We will be satisfied with nothing less than full responsible government," insisted Dr. B. B. Moonje, leader of the Hindu Mahasabha, a protection society.

"I have no particular comment to make upon recent rumors and reports relating to the Canadian National Railways other than the fact that the administration has not the slightest complaint regarding its treatment by the present government and has no apprehensions with respect to future treatment."

Wheat Pool Favors Free Trade in West

CALGARY, Nov. 27.—After a lengthy discussion of the benefits and disadvantages of a protective tariff policy for the Dominion as it affects the farmers in western Canada, delegates to the annual meeting of the Alberta Wheat Pool Thursday passed a resolution asking that the three prairie provinces be permitted the constitutional right to establish freetrade.

THE PICTURES

That comedy and dialogue go hand in hand is proved conclusively at the Orpheum Theatre, where the comedy, "Pete and Sam," is being shown Friday and Saturday of this week.

The plot of this travesty on the making of talking films concerns a Kansas beauty prize winner who, together with her mother and manager, attempts to crash the gates to Hollywood fame. The girls instead is crashed by the manager when the studio guard is not looking and this absent-minded individual wanders innocently about the set, blundering into the way of camera, tripping up electrical appliances, interrupting a melodramatic bed-room scene, sitting on a lever which explodes, and charges of dynamite and creating other such unhappy and riotously funny problems for directors and studio employees.

Unusual Agitation of Stars. During these scenes about every one connected with the Metro-Goldwyn-Mayer company is seen in some capacity or other. For example, Haines, Dorothy Sebastian, Karl Kane, Marion Shilling, Green Lee, John Miljan, Lottie Howell down, while even such important personages as Lionel Barrymore, Cecil B. De Mille, Fred Niblo and David Burton take part in the proceedings.

Despite all the efforts on the part of the studio, the Kansas beauty never does get into the movies, but in the end, both her mother and manager do, while she lands in the arms of a screen hero, so everybody is happy when the curtain comes down.

Thursday, Friday, and Saturday of next week the feature picture is "Once a Priestman." It is a most humorous story, with a fine plot of love and heart interest.

CRAWLING VALLEY NEWS

Mr. and Mrs. Frank Harper and children, E. J. Harper, Mr. and Mrs. Harold McKinney and Miss Loh McKinney were dinner guests at the Thew home for Thanksgiving.

Mr. and Mrs. "Dutch" Bryant were callers at the Robson home on Monday.

Mrs. R. Robson was in Calgary last week.

W. R. Whitney made a trip to Thursday, crossing the river on the ice on Monday.

\$47,000,000 FIRE LOSS DURING 1935

Ottawa, October 31th, Canada's fire loss in 1935 exceeded \$47,000,000, Premier Bracken of Manitoba told delegates to the Dominion Fire Prevention Association convention here. Manitoba's loss during the year totalled \$2,500,000. "If you can stop that we will not have to come down here for relief," said Mr. Bracken, who was in the capital arranging for Manitoba's share of the \$20,000,000 voted by parliament in September for unemployment relief.

In commenting the work of the association the Premier pointed out that despite the heavy dominion losses fire insurance rates in Canada had been reduced about thirty per cent during the last nine years.
